

Recycle

Dedicated to helping
manufacturers
manage recycling.

Turning waste into an income stream makes real business sense. Of course, you'll be looking for best price, but good working relationships count for a lot too, and with EMR you're guaranteed both.

We've been working with manufacturers for many years, and we're well versed in the issues that can arise and the pressures you face, so we're flexible. We can adapt our service to your specific operation, and handle any waste you generate, in any quantity, from a one-off clearance project, to a waste disposal contract handling several thousand tonnes.

We can collect from site and, with over 70 sites across the UK, we're never far away. We can be with you within 24 hours, and work non-stop until the job's done.

Recycle

We offer highly competitive prices for all your metallic and non-metallic waste, even in low volumes. Price isn't the only issue. You have to be confident that we're paying you correctly by weight, so we have a number of procedures in place to provide the assurances you need, including secure skips and bins with unique security seals as well as accurate weighbridges with CCTV monitoring.

We handle all the waste we buy responsibly, ensuring you're compliant with legislation, and we always keep up with how any changes might affect you.

We can also provide a secure destruction service with photo/video evidence and a Certificate of Destruction if required.

In short, we've thought of everything to turn your waste into an asset.

- Flexible and responsive service with a dedicated account manager.
- Handle any amount of any waste, as a one-off project or ongoing contract.
- Skips, bins, a fleet of vehicles and nationwide rail network makes collection and transportation easy.
- Tight security ensures you're paid accurately, including security seals on skips and bins, and CCTV monitored weighbridges.
- Highly competitive prices for all metallic and non-metallic waste.
- Help with legal compliance including establishing and meeting recycling targets.
- Secure destruction service with photo/video evidence and a Certificate of Destruction if required.
